## Experience

### Full-Stack Developer

[Flow](#)

2024-08-12 - 2025-03-31t

**Stack:** React.js, Next.js, Nest.js, Typescript, TypeORM, PostgreSQL, Tailwind CSS, MUI, Jest

- Developed and maintained a full-stack **ERP** system to optimize business operations in the construction industry.
- Implemented an After-Sales Service (SAV) module that enhanced customer support processes and boosted client satisfaction.
- Ensured high-quality code with **Jest** unit testing and contributed to Agile teams through sprint planning and code reviews.

### Front-End Developer

[Billo](#)

2024-02-01 - 2024-08-01

**Stack:** React.js, Next.js, Typescript, TanStack Query, Styled Components

- Developed an intelligent web application for digital mail and payments management, leveraging AI to digitize and organize Documents, a key factor in driving over 52K monthly visits
- Developed and implemented a robust payments module that streamlined financial processes and enhanced transaction accuracy, further contributing to the platform's strong user engagement.
- Collaborated with cross-functional teams, including designers and marketers, to align website updates with the brand guidelines and marketing strategies.

## Projects

### Matcha

[Project link](#)

2024-11-25 - 2025-01-10

**Stack:** Typescript, Next.js15, React.js19, Tanstack Query, Tailwind Css, ShadCn, Express.js, Postgresql (No ORM)

- The web project from School 42 is a dating website where the user can create a profile, search for other users, like them, and Begin a conversation if the person you like likes you back.

### Azedine Ouhadou

[Project link](#)

2023-10-17 - 2022-11-18

- Create my 3D portfolio using Nextjs React-Three-Fiber, and Tailwind CSS for responsive styling.
- Implement some smooth animations and transitions using Framer Motion and GSAP libraries, enhancing user experience.

### Transcendence

[Project link](#)

2023-05-16 - 2023-09-07

Our team of 4 co-developed a real-time ping-pong web application. My responsibilities included:

- Developed and implemented four key pages (landing, login, 2FA, Leaderboard), a dynamic dashboard, and a user settings page using **Next.js**, **React.js**, **Tailwind CSS**, and **TypeScript** to enhance user experience and engagement.
- **Back-End:** Implemented **OAuth2** authentication for 42 and Google, integrated two-factor authentication (2FA), and Designed user actions, increasing user security using **NestJS**, **PostgreSQL**, and **Prisma**.
- Developed a notification system. This has resulted in enhanced user engagement.

## Skills

- JavaScript | TypeScript | Nodejs | React | Next.js | Nestjs | HTML | CSS | Tailwind Css | Styled Components | REST API
- GIT | Figma | Command Line Interface | Docker | Docker Compose
- English C1 | Arabic native | French B2

## Education

### Degree in Software Engineering
